NEW ZEALAND CONDITIONS

MAJOR FEATURES

- + COMMERCIAL GRADE TOOL
- + 3 YEAR WARRANTY*
- + LIGHTWEIGHT & PORTABLE 13.5KG
- + UP TO 200 Y POSTS PER HOUR
- + SPRING DAMPENED HANDLES
- + 1720BPM DRIVE WARATAHS INTO HARDEST GROUND IN SECONDS
- + RELIABLE HONDA MOTOR
- + SUITS STANDARD Y POSTS

The Christie Post Driver was developed by Christie Engineering to suit the harsh Australasian environment. Weighing 13.5kg for the CHPD52 and 15.5kg for the CHPD78, both models are lightweight and portable but still able to drive posts as swiftly as much larger and heavier hydraulic and pneumatic tools.

The high impact hammer action of 1720BPM will drive steel Y posts into the hardest ground in a matter of seconds and the portable design allows operators to move along a fence line with ease. The driver uses an efficient Honda GX35 4-stroke motor to give the best service life possible. Over 4,000 machines sold, and proven, worldwide.

The CHPD52 has a 52mm receiver guide tube which allows most standard posts and pipe up to 50mm diameter, as well as timber 35mm square to be driven, while the CHPD78 has a redesigned lower hammer section to allow much larger posts and pipe to be driven right up to 75mm diameter without any other adapters. The redesigned lower hammer transfers the impact to the post more efficiently allowing larger posts to be driven with ease.
