

The Capstan Rope Winch

The Capstan Rope Winch is designed for pulling with any length of rope. It's portable and light weight making it ideal for pulling game, boats, ATVs, logs and more.

The SP-CW model is self propelled by a Honda GX 35 4 Stroke OHC engine, with an approved spark arrestor and throttle control. It can pull up to 1000 kg with a straight line pull of 7 metres / min. The Capstan Rope Winch weighs 8 kgs and comes with a 5 year winch warranty and 1 year engine warranty.

MAJOR FEATURES

- No limit to the length of cable that a drum will hold.
- Pulling power does not decrease as the drum fills.
- You can take up slack in the winch line or play out line by hand, without running the winch.
- Petrol powered winches excel for long, remote pulls as you're not tied to a vehicle battery.
- Portable. Carry in your hand, back pack, vehicle or boat. Lock and store when not in use.
- Pull loads long distances or continuously without overheating the motor or loss of pulling power.
- Pulls with rope, not wire cable.
- Strong, flexible, lightweight rope is readily available.
- Rope can be knotted and tied.
- Rope is safer if it breaks and snaps back.
- Made in the USA.
- Plywood storage case available as extra.
